Tech Lead / Staff Software Engineer

Foundational Services Next.js, TypeScript, GraphQL, Node.js, Bun, Effect TS, React Ink, Java, Envoy, Terraform, K8s, OAuth2, RBAC, AWS, Rust, Buildkite

- Architected microfrontends framework for Flexport. Lead team of 7 engineers to create this, onboarded six separate orgs. Became foundation for Flexport's most profitable applications.
- Championed OE across GraphQL stack. Reduced latency by 50%. Increased reliability from 90% to 99% by architecting error attribution system, driving company-wide accountability.
- Standardized GraphQL authz and service-to-service authz across all microservices.
- Standardized service discovery on AWS CloudMap, merging several competing standards.
- Led team of 4 to consolidate ingress across all apps and APIs into unified API gateway.
- Drove consolidation of similar libraries and developer tools across codebases. Measured DevX improvements with velocity metrics, code reduction, and developer surveys.
- Led Flow to TypeScript migration for legacy websites and tools.
- Led migration from Algolia to OpenSearch for warehouse org, saving \$500k per year.

Tech Lead / Senior Software Engineer

Flex TypeScript, GraphQL, Node.js, Express, Spinnaker

- Drove adoption of UI-as-data microservice "Flex", enabling minimal device rendering code.
- Led migration of Flex from REST to GraphQL; integrated into Disney's supergraph.
- Partnered w/ overlapping Disney team. Flex took over UI as data, they took over i18n.

Software Development Engineer II

Fire TV Java, Kotlin, Lambda, AWS, DynamoDB

- Designed, implemented serverless component that ingests IMDB catalog. Event-driven.
- Last Mile Identity** Java, AWS, Cognito, Coral (RPC), Lambda
- Extended OAuth microservice to support AuthN of various additional user types.
- Led redesign of RBAC authorization microservice.

Last Mile Account Management Java, AWS, Coral (RPC), Elasticsearch, React

- Designed and implemented microservices as part of legacy monolith rearchitecture.
- Created hybrid web-app views in React for delivery driver onboarding.

Last Mile Risk and Compliance Java, AWS, Angular, mTLS, Coral (RPC), SQL

- Integrated background check microservice with external vendor REST APIs.
- Extended services responsible for facial recognition of package deliverers
- Created data warehousing pipeline platform for Dynamo DB to Redshift streaming.

Payments Experience Scala, Java, jQuery, SCSS, Coral (RPC)

- Designed and implemented OTP verification for payment screens. Full-stack project.

Lead Software Engineer

TypeScript, GraphQL, React, React Native, Ruby on Rails, Jenkins, AWS, MySQL

- Built Ruby on Rails ERB / jQuery webpages then later migrated these to React + GraphQL.
- Designed MySQL schema. Optimized DB migrations, SQL transactions, ORM code.
- Maintained server infrastructure; configured EC2, Jenkins, Nginx, MySQL, Redis.
- Led project to create new mobile app using React Native, Redux, and Apollo GraphQL.
- Integrated 3rd-party APIs such as Stripe, Zillow, TransUnion, Twilio, Mailgun, etc.

Junior Software Engineer

PHP, Laravel, Java, SCSS, jQuery, C#, Angular, Ionic

- Created company marketing website and blog using CSS, jQuery, and PHP.
- Wrote web crawlers to pull online health-care data ontologies using C#.
- Wrote utilities to parse and normalize HL7 electronic health records using Java.
- Created proof of concept mobile application using Ionic 1.0.
